

TREATMENT AUXILIARIES
INFECTION CONTROL

DENITAI CATAILOG

WOUND CARE, MOISTURE AND INFECTION CONTROL

The product range of treatment auxiliaries at COLTENE is very closely linked to the brands BioSonic, HYGIENIC and ROEKO and is held in high esteem worldwide. For over 100 years, ROEKO has now been a synonym for reliable quality and technical know-how. This includes the fields of wound care, moisture and infection control.

Protection and reliability are important issues in the dental practice and its reliability is essential. To this purpose, COLTENE offers a range of proven as well as exceptional hygiene solutions which reliably provide barriers to infections. This includes mouth protection with Protecta, patient protection with Simplex aprons and covers from the Steri product family. Active measures in the hygiene chain include ultrasonic cleaning and disinfection. The particularly quiet BioSonic ultrasonic devices provide highly efficient cleaning and excel through their diversity. Suitable cleaning solutions and efficient disinfectant agents round off this programme.

For moisture control the well known ROEKO product brand, such as Luna, Parotisroll cotton rolls, cotton pellets or Surgitip aspirator tips. Inconspicuous practice aids maybe, but they need to work day in, day out, in terms of making treat-

ments easier and providing patient comfort. COLTENE guarantees quality products here through its fully automated manufacturing processes. The same applies to the latex-free, tear-resistant ROEKO Flexi Dam which excels through its extreme, 1000 % elasticity. The extremely broad HYGIENIC dental dam range provides the right clamp for any indication.

Cotton swabs, tamponades or the Gelatamp gelatine sponges for promoting coagulation are available for wound care. The HANEL brand occlusion testing products have been available for 50 years for precise occlusion representation in the dental practice and laboratory.

COMPANY

COLTENE is a global leader in the development, manufacture and sale of consumables and small-size equipment for dental treatment applications.

The Dental Group offers a wide range of products, encompassing six segments – solutions for almost all dental treatments. The complete endodontology programme includes root canal preparation with files and rinsing solutions, obturation and post systems. The next extensive range is centred entirely on restorative filling therapy. This particularly includes temporary and permanent filling materials, as well as adhesive systems and polymerisation lamps. Prosthetics represents a further main area. It includes a wide spectrum of condensation and addition cross-linking impression materials. The segments of treatment aids, infection control and rotating instruments round off the programme.

COLTENE has time and time again developed pioneering innovations for over 50 years, and ROEKO for over a 100 years who offer the user first grade dental solutions.

Today the COLTENE Group operates production facilities in Switzerland, Germany, Hungary, Brazil and the USA. It maintains a worldwide sales network with its own subsidiaries and distribution partners in over 120 countries. COLTENE therefore serves dentists, dental technicians, opinion leaders and universities with tailored quality products and services – worldwide.

Cotton

Dental Dam Clamps

Dental Dam

Treatment Auxiliaries

COTTON

Sophisticated fully automated production at the Langenau site in Southern Germany ensures precision and the highest quality for ROEKO cotton wool products. Consumption in the dental practice is therefore low - thus ensuring trouble-free working and perfect results. Besides quality, labour saving is always in focus for the dentist and the patient's convenience too. That is why ROEKO cotton rolls are unusual and versatile and fulfil very specific requirements.

Luna Gold - tissue friendly dental roll

Luna Gold has a mucophile cover and can therefore be removed without wetting the dental roll beforehand. There is no risk of tissue inflammation.

Luna for kids - dental roll for children

The Luna for kids rolls are extra short and keep their shape throughout treatment. They create sufficient working space even in the smallest mouth.

Parotisroll - with spring action inside

Parotisroll fixes itself and placed correctly on the parotis gland reducing the patient's saliva flow.

DENTAL DAM

Rubber dam allows individual teeth or entire rows of teeth to be isolated and therefore an aseptic, completely dry working area can be created. The unobstructed view of the treatment site saves treatment time and the rubber dam also protects against injuries to the mucous membranes and prevents swallowing of endodontic flushing solutions and instruments. Under the two quality brands - HYGENIC and ROEKO - COLTENE offers all materials needed for professional use of rubber dam. Alongside standard materials, various special products simplify treatment of children, allergy sufferers or the use of rubber dam in medically complicated cases.

Elasti-Dam - extra elastic powderfree latex dam

Easy application thanks to high elasticity. Low allergenic latex protein stress for the patient and practice team. Available in standard and child sizes.

Framed Flexi Dam non latex - latexfree dental dam with built-in frame

Pre-framed, the time required for applying the rubber dam is reduced.

Fiesta color coded tiger clamps

Rubber dam clamps with prongs hold particularly well, even there is less tooth substance available.

Dental Dam Kits - all in one

A rubber dam set is an ideal way to start, as it contains everything for the use of rubber dams.

ROEKO Luna

The firmness and compactness of Luna rolls make them so economical. There is no need to frequently replace them during treatment, so time consuming and expensive disturbances are a thing of the past. Luna goes on absorbing throughout the dental procedure and continues to retract the cheek – important aspects when choosing a dental roll.

- retracts cheek effectively
- keeps its shape and does not fall apart when full of saliva
- absorbs moisture throughout treatment
- packed in plastic bags protecting contents from moisture and dust

Size	300 g

ROEKO Cotton-roll

Cotton-roll is the softer, more absorbent dental roll for those dentists, who prefer rolls made entirely of cotton.

- highly absorbent
- soft and smooth
- packed in plastic bags protecting contents from moisture and dust

Size	1000 pcs
1	104 011
2	104 012
3	104 013
Export only	

ROEKO Luna for kids

Extra short and absorbent for small patients

Luna for kids dental rolls specially for children. Due to their shortness Luna for kids are easily placed and removed. Unlike standard dental rolls Luna for kids don't cause any pressure and pain in a child's mouth. Preventive dentistry, and treatment with fillings and sealants run more smoothly. Their high absorbency prevents regular changing. Keeping their shape throughout treatment they create sufficient working space even in the smallest mouth.

- extra short
- easily placed without causing unpleasant pressure in small mouths
- highly absorbent – no need for disturbing changing
- keep their shape throughout treatment – effectively retract cheek and lips

Size	200 pcs
2	100 032

ROEKO Luna Gold

A gold stripe for your dental office

Luna Gold is a unique dental roll – you see and feel the difference. Luna Gold has a muco-philic cover which prevents contact between the fibres and the soft tissue. Luna Gold can therefore be removed without wetting the dental roll beforehand. There is no risk of tissue inflammation, an important feature when treating sensitive patients. The exceptional quality of Luna Gold is easily recognised – the gold stripe differentiates Luna Gold from standard dental rolls.

- no risk of tissue inflammation
- absorbs moisture throughout treatment
- does not fall apart when full of saliva
- non chlorine bleached
- Best quality made in Germany

ROEKO Parotisroll

Parotisroll is a unique dental roll with a spring action inside. Due to the spring action Parotisroll stays in place and provides more working space. Dental treatment runs more smoothly and with greater efficiency.

- When used **buccally** Parotisroll exerts gentle pressure on the parotis reducing saliva flow. It retracts the cheek and the spring action helps keep the mouth open.
- When used **lingually** the arched roll holds down the tongue
- When placed **labially** Parotisroll retracts the lip making it ideal for use in cosmetic dentistry, orthodontics and when treating children

Size				100 pcs			
1	ø 9 mm	80 mm	160 001	3	ø 10 mm	100 mm	160 003
2	ø 10 mm	80 mm	160 002	5	ø 8 mm	100 mm	160 005

ROEKO Parotisroll anatomic
by Dr. Hannelore Oberschachtsiek

Parotisroll anatomic is the Parotisroll with flattened ends. The flat ends make the placement of the dental roll easier and reduce the “foreign body feeling” for the patient. Patients gag more frequently as the dentist works more distally, due to the unusual position of the tongue, and will try to push the roll to the front of the mouth with the tongue. Parotisroll anatomic exerts less pressure onto the tongue’s margin than standard dental rolls. The treatment of sensitive patients with a strong gag effect will be much easier.

- Anatomic shape – easier to place than standard dental rolls due to flattened ends
- Reduced foreign body feeling – treatment of sensitive patients with a strong gag effect will be easier
- Spring action inside – dental roll stays in place

50 pcs in practical dispenser box	160 013
ø 10 mm, 100 mm	

ROEKO Roll-o-mat

The Roll-o-mat dispenser is simply ingenious: slight pressure on the lid is sufficient to dispense just one roll, which stays on the fork ready for use. The remaining rolls are protected from spray and dust. The Roll-o-mat dental roll dispenser is available in plastic or chrome nickel steel and can be used for dental rolls sizes 1, 2 and 3 provided that they have a standard length (36–40 mm). The Roll-o-mat is not suited to dispense Luna for kids. Both dispensers can be autoclaved up to 134 °C.

ROEKO Roll-o-mat Plastic, white	120 004
Size 134 × 100 × 48 mm	

ROEKO Roll-o-mat Chrome-Nickel-Steel	120 005
Size 134 × 100 × 43.5 mm	

ROEKO Lunamat

The Lunamat dispenser is equipped with a drawer. On opening the drawer 2–3 dental rolls are ready for use. The remaining rolls are protected from spray and dust. The dispenser is suitable for standard dental rolls size 1, 2, 3 and 4 and for Luna for kids.

ROEKO Lunamat	120 000
----------------------	----------------

ROEKO Parotimat

Parotisroll dispenser holds 50 Parotisrolls. The dispenser enables individual removal and hygienic storage of Parotisroll and Parotisroll anatomic.

ROEKO Parotimat	162 100
Size 112 × 103 × 82 mm	

ROEKO Cotton Pellets

ROEKO cotton pellets are super soft and extremely absorbent. Fully automated production and best quality cotton ensure constant high absorbency and uniform size and shape from pellet to pellet.

ROEKO Solomat-Click

Solomat-Click consists of the base, the refill and the dispenser surface. The three parts simply “click” together. The stainless steel base ensures stability. The rounded bars in the grille facilitate individual removal of pellets while keeping their shape. The lid protects the pellets from spray and dust. The refill which forms the body of the dispenser can be repurchased as required. Solomat-Click is available for pellet sizes 000, 00, 0 and 1.

Dental Dam

The use of dental dam isolates the treatment area and guarantees best possible moisture control. Soft tissue is protected and there is no risk that the patient aspirates or swallows instruments. The risk of cross infection is reduced. Thus working with dental dam is safe and more efficient.

HYGENIC Dental Dam

HYGENIC Dental Dam is made of pure, natural rubber latex. Tough and hard to tear, the powdered material is used as a barrier during operative and endodontic procedures.

HYGENIC Dental Dam Clamp Sets

Contain the clamps most needed for dam applications. Contains the following clamps: 1, 2, 4, 7, 8A, 9, 12A, 13A, 14A

System-9 Winged-Clamp-Pak	H02701
---------------------------	--------

HYGENIC Gloss Finish Wingless Clamps

To apply, first position the clamp intraorally then stretch the dental dam over the clamp and tooth. Wingless clamps are designated with a "W" (wingless) for easy identification.

#212	Anterior teeth	H07792
#W00	For upper and lower premolar and anterior teeth	H02769
#W2	Premolars and upper incisors	H02768
#W2A	Premolars and upper incisors	H02775
#W3	Flat jawed, small molar clamp	H03814
#W7	Flat jawed, general purpose, lower molar clamp	H02765
#W8	General purpose, upper molar clamp	H02767
#W8A	Downward sloped jaws for small, partially erupted molars	H02766
#W9	Anterior teeth	H02770
#W14	For partially erupted or irregularly shaped molars	H02774
#W14A	Downward sloped jaws for large, partially erupted molars	H02764
#W56	Universal molar clamp	H03815

ROEKO Clamps

ROEKO winged clamps provide extra retraction of the dam from the operating field.

ROEKO Clamp Set		390 050
The set consists of clamp #00, #206, #209, #200, #201, #212		
#00	Premolar, high bow, narrow jaw	390 051
#206	Upper molars, concave jaw shape	390 052
#209	Upper premolar, distinctive concave jaw	390 053
#200	Anterior tooth, double-bow	390 054
#201	Lower premolar, flat clamp mouth	390 055
#211	Anterior tooth	390 056
#212	Lower molar	390 057

HYGENIC Fiesta Color Coded Matte Finish Clamps

Each clamp is individually color coded for unmistakable identity. Non reflective matte finish for better visibility. For convenient storage the 9 color coded clamps are placed on 9 matching color coded pegs on the stainless steel organizer.

Hygenic Fiesta Color Coded Matte Finish Winged Clamps		
#2	● Premolars and upper incisors	H09957

HYGENIC Dental Dam Frame			
Three types to choose from:			
Ostby plastic frame – radiolucent	6"	(152 mm)	H00560
U-shaped plastic frame – radiolucent	6"	(152 mm)	H01414
U-shaped metal frame	6"	(152 mm)	H07083
All frames are autoclavable			

ROEKO Metal frame

The u-shaped frame acc. to Young has several prongs along its length to hold the dental dam tightly. The frame is made of high quality chrome nickel steel and can be sterilized.

ROEKO Metal frame	390 040
-------------------	---------

ROEKO Plastic frame

The oval frame is radiolucent and can be folded for taking x-rays and for aspiration. The frame is autoclavable up to 134 °C.

ROEKO Plastic frame, foldable	390 041
-------------------------------	---------

HYGENIC Dental Dam Frame

Two types to choose from:

U-shaped plastic frame – radiolucent	5"	(127 mm)	H01416
U-shaped metal frame	5"	(127 mm)	H07082
All frames are autoclavable			

Children's size

HYGENIC Dental Dam Punch

Punch with 5 holes H01261

ROEKO Punch

High quality instrument with 8 holes for Flexi Dam, Dental Dam Latex and Dental Dam Silicone non latex. Easy to handle and can be sterilized in the autoclave or dry heat sterilizer.

ROEKO Punch 390 010

HYGENIC Extended Reach Punch

- 12 mm greater reach than traditional punches - ideal for use with pre-framed dental dams
- The punch comes with two different sized dies - #2 for anterior teeth and #4 for posterior teeth
- Easy to change dagger and dies without any additional tools

Punch with dagger and one #2 and #4 die of each	H01253
dagger	H01256
#2 die	H01254
#4 die	H01255

HYGENIC Dental Dam Forceps

Enables secure transfer and fixation of the clamps to the tooth. H01262

ROEKO Clamp Forceps

High quality forceps to enable a secure transfer and fixation of the clamps to the tooth.

- easy to handle
- can be sterilized in the autoclave or dry heat sterilizer

ROEKO Clamp Forceps	390 011
---------------------	---------

Wedjets Stabilizing Cord

Alternative or in addition to conventional clamp method of securing dental dam.

Latex available in 3 sizes and non-latex in 2 sizes.

Latex			
extra small	blue	7 ft. (2.1 m)	H08040

Aspirator tips Surgitip

Treatment Auxiliaries

ASPIRATOR TIPS

The ROEKO Surgitip aspirator tip product family presents itself as well thought through and innovative. The plastic tips are hygienic, easy to handle and with their eye-catching green tips they enable extremely precise suction in surgery and microsurgery. The fine Surgitip-endo facilitates aspiration, even in the root canal.

Surgitip-endo

Endodontic aspirator tip for root canal treatment

Surgitip-endo removes rinsing solutions and moisture quickly and effectively from the root canal.

Surgitip Aspirator tips

The plastic aspirator tips allow extremely accurate aspiration as the shape and design have been specially developed for working under a microscope or loupe.

Concorde II

for aspirating high volumes

Aspirator tip for universal aspiration which gently keeps the tongue and cheek away.

ROEKO Surgitip

Surgitip aspirator tips are proven aids in drying the oral field of treatment in minimally invasive surgery and in aspirating particles. The plastic aspirator tips allow extremely accurate aspiration as the shape and design have been specially developed for working under a microscope or loupe. The tips are ideal because of their hygienic handling and ease of use.

- The green tip provides excellent contrast for precise aspiration
- Open field of view due to the narrow shape and conical tip
- Hygienic and time-saving, as packaged individually and ready for immediate use
- Various aspirator diameters for a wide range of treatments

Surgitip with green tip	
Tip opening ø 2.5 mm / End-opening ø 6.5 mm	
20 pcs*	462 025
100 pcs**	462 026

Surgitip without green tip	
Tip opening ø 4.8 mm / End-opening ø 6.5 mm	
20 pcs*	462 048
100 pcs**	462 049

* includes 1 Double Adapter
 ** includes 5 Double Adapters

ROEKO Surgitip-micro

Surgitip-micro is specially designed for use with microscopes and loupes. The extra fine tip-opening of 1.2 mm ensures precise aspiration without blocking the field of vision. Surgitip-micro is sterile and ready for use in peel packs.

Surgitip-micro with green mirco tip	
Tip-opening ø 6.5 mm / End-opening ø 1.2 mm	
20 pcs*	462 012
100 pcs**	462 013

* includes 1 Double Adapter
 ** includes 5 Double Adapter

ROEKO Surgitip-endo

Surgitip-endo is an aspirating tip specially designed to dry root canals. The innovative design of the suction tip allows for a multi-directional flexibility, so it can easily be introduced into hard-to-reach root canals without having to bend the Canal Tip. Aspiration is highly effective at all angles and visibility is not constricted.

Surgitip-endo	
End-opening 0.35 mm, ISO 60 / Tip-opening ø 6.5 mm	
20 pcs*	6001 8280

* includes 1 Double Adapter

ROEKO Aspirator tips

The plastic aspirator tips for single use with an opening of 4.8 mm are ideal for moisture evacuation during all standard procedures where sterility is not a requirement. Supplied with an autoclavable Double Adapter to fit on all equipment.

Aspirator tip without green tip	
Tip-opening ø 6.5 mm / End-opening ø 4.8 mm	
100 pcs*	461 048

* includes 1 Double Adapter

ROEKO Concorde II

The smooth contours of the Concorde II aspirator tips mean they are comfortable for the patient and easy to clean. Concorde II is made from high quality, durable plastic.

- low noise suction
- flange retracts tongue and cheek gently
- matt surface prevents light reflection
- can be sterilized in autoclave or chemiclave up to 134 °C
- the tips are available with ø 11 mm and ø 16 mm for all standard equipment. The 11 mm tips are supplied with an autoclavable Adapter.

Size		
ø 11 mm*	10 pcs	450 211
ø 16 mm	10 pcs	450 216

* includes 1 Adapter

Adapter and Double Adapter

To ensure that ROEKO aspirator tips can be used on all standard aspirating equipment, Adapters are available. All Adapters are autoclavable and chemiclavable up to 134 °C.

Double Adapter		463 000
The Double Adapter can be used to fit Surgitip, Surgitip-micro and the non sterile aspirator tips onto ø 11 mm and ø 16 mm equipment.		

Adapter			
For connecting Concorde II and Surgitip canulas to 11 and 16 mm aspirating equipment

Surgical Sundries

Surgical Sutures

Electrosurgery System

Treatment Auxiliaries

SURGICAL SUNDRIES

Professional wound care following extraction and other surgical procedures support the body's own healing process and prevents postoperative wound infections. COLTENE wound care products are versatile and are used for initial haemostasis, in disinfection and for dabbing and drying the wound, through to wound closure with a surgical suture.

ROEKO Swab

Gauze swabs made of finest gauze fabric

Absorbent gauze swabs with stable folds for wound care and to bite on during treatment.

ROEKO Gelatamp

antimicrobial depot effect with colloidal silver

Gelatine sponge for quick initial haemostasis after surgical treatments and for preventing wound infections.

PerFect® TCS II

High frequency electrocautery system

Cutting and coagulation in soft tissue with precision.

ROEKO Gelatamp

Gelatamp gelatine sponge with colloidal silver provides the dentist with an effective, biocompatible product for reliable post extraction treatment. The colloidal silver has a bactericidal depot effect.

- quick haemostasis
- stabilises the blood coagulum
- smooth and complete resorption
- effective against a wide range of bacteria
- prevents infection through its long lasting antimicrobial effect

With Gelatamp

- there are no complications in the healing process
- the wound does not have to be reopened
- time is saved

Box		
20 pcs	14 × 7 × 7 mm	274 002
50 pcs	14 × 7 × 7 mm	274 007

Blister Pack		
20 pcs	14 × 7 × 7 mm	274 008

Surgical Sutures

ROEKO's range of atraumatic needle-suture combinations and surgical sutures is ideal for a wide range of operations in oral and gnatho surgery. The tangle free sutures are easy to knot and stretch resistant. For easy identification the sutures are color coded:

Silk: black
Flexafil: green

ROEKO Sintraumal

Sintraumal is an atraumatic needle-suture combination and ideal for use during surgical treatment in the dental practice. The eyeless, precision ground needles glide gently through the tissue and do not cause unnecessary trauma. Sintraumal is time-saving as it is packed, ready to use, in a sterile double peel-pack; threading and sterilization are not necessary. Sintraumal is available in 7 needle/suture combinations. Sintraumal is non-resorbable.

Needle-Suture Combination				Suture 45 cm	12 pcs

PerFect TCS II

PerFect TCS II, a high frequency electrosurgery system, helps manage soft tissue with greater efficiency, greater precision and less bleeding than the common dental scalpel.

- removes unwanted tissue with ease
- reduces chair time by simplifying operative procedures and maintaining hemostasis
- provides outstanding cutting precision for superior clinical and aesthetic results
- allows uneventful healing
- two applications: cutting and coagulation
- autoclavable electrode sheaths

Other clinical applications:

- widening gingival sulcus
- crown lengthening
- exposing impacted teeth
- removing hyperplastic gingiva
- Frenectomy
- Incising abscesses

Infection Control

INFECTION CONTROL

In order to be in a position to work free of hygiene risks, COLTENE offers proven and extraordinary product solutions. Every patient and each member of the practice is a potential carrier of infection which can be transmitted to others. With the number of patients and the range of dental procedures involved every action in the hygiene chain must be routine. The safer and more user-friendly the products for preventing infections are, the faster and easier this can be accomplished. COLTENE is an experienced manufacturer of high-quality hygiene products for dentists.

With our certification under DIN EN ISO 13485 Medical Devices – Quality Management Systems we are obliged to implement quality assurance measures throughout all company processes.

Protecta active carbon

Fluid resistant face mask with activated carbon

Protects against pathogens and also against unpleasant odours.

Sterile Covers

for tubes, trays and other surfaces

High performance infection control according to the European Norm EN 13795 for surgical drapes.

BioSonic®

Ultrasonic Cleaning Units

To avoid cross-contamination, caused by contaminated instrument.

BioSonic

BioSonic Scaler System

- BioSonic magnetostrictive Ultrasonic Scaler System automatically adjusts to work with any manufacturer’s 25 kHz or 30 kHz inserts
- Faster hard calculus removal with on-demand maximum power turbo boost button
- Ergonomic handpiece improves operator’s comfort during extended scaling
- Smallest footprint minimizes counter space requirements
- BioSonic inserts - variety of most popular tip designs in both 25 kHz and 30 kHz
- Better performance reliability and longevity through patented manufacturing process

BioSonic SuperSoft Inserts

- Maximum comfort in popular tip designs
- SuperSoft cushioned non-slip silicone grip
- Greater tactile sensitivity and rotational control

**BioSonic
Ultrasonic Cleaning Systems**

Designed for user safety

- FingerGuard instrument baskets keep sharp instrument points inside basket minimizing possibility of accidental finger sticks.
- Raised ridges inside baskets for easy and safe removal of instruments.
- Built-in drain with extra-long drain tube allows you to safely dispose of contaminated solutions without ever touching them. No lifting. No spills.
- The fully functional cover returns condensation back into the ultrasonic bath to limit airborne contaminants into the work environment.

Wear-resistant plastic housing

- Will not stain, scratch, rust or dent.
- Remains esthetically pleasing for years.

Quiet performance

- Tank cover completely encloses basket and beaker(s), significantly reducing noise level in your practice.
- Precisely tuned performance for optimal cleaning and quiet operation.
- Rubber pads on accessories prevent annoying rattle.

Synchronous timer

- Precisely timed cleaning cycles
- Cleaning cycles up to 30 minutes (UC50DB)
- Cleaning cycles up to 60 minutes (UC300 + UC125)

BioSonic UC300

- Tank capacity 14.4 l

General Purpose

BioSonic Super Concentrate General Purpose

Ultrasonic Cleaning Solution used for contaminants like blood, debris, saliva and general cleaning. Items to be cleaned are instruments, crowns, bridges, dentures and ultrasonic scaler tips.

473 ml MeterDose Bottle equals 30 l	UC30
--	------

BioSonic General Purpose with corrosion protection

The new BioSonic UC31 General Purpose Cleaner combines the proven cleaning action of a BioSonic solution with corrosion protection in the ultrasonic bath. BioSonic UC31 comes in easy to use unit dose packets that make 2–4 liters of solution each. The concentrated liquid readily mixes in cold and warm water. As compared to powder no stirring is required to mix the UC31 concentrate in the bath. The practical dispenser box contains 20 unit dose packets.

20 × 15 ml equals 76 liters of solution	UC31
--	------

BioSonic Enzymatic Ultrasonic Cleaner

Used for contaminants like protein soils (dried blood, tissue, saliva) and general cleaning. Effectively breaks down and loosens hardened debris on instruments. Items to be cleaned are instruments, crowns, bridges, dentures and ultrasonic scaler tips.

236 ml MeterDose Bottle equals 30 l	UC32
--	------

BioSonic Plaster and Stone Remover

Powder Concentrate used for contaminants like plaster and stone. Items to be cleaned are dentures, partials, casting, denture flasks, mixing bowls and non-aluminum articulators.

840 g jar equals 11.4 l	UC34
----------------------------	------

BioSonic Germicidal Ultrasonic

Cleaning Concentrate used for contaminants like blood, debris, saliva and for general cleaning. Cleans instruments as it disinfects ultrasonic bath. Items to be cleaned are instruments, crowns and bridges.

236 ml MeterDose Bottle equals 30 l	UC38
473 ml MeterDose Bottle equals 60 l	UC42

Ultrasonic Cement Remover

Remover Concentrate

16 oz (473 ml) MeterDose Bottle for 32 uses	UC39

OCCLUSION VERIFICATION

Occlusal testing and correction is one of the most demanding fields in modern dentistry.

HANEL offers a complete programme for occlusal testing in the lab. and practice, as well as optimal instruments and other accessories for easy handling.

The testing medium has the required thicknesses, suppleness, tear resistance and ink pick transfer, so punctiform, area or linear contacts and microcontacts can be reliably registered.

Thick test material

Stronger contacts are coloured over an area.

Medium fine test material

The universally applicable test medium.

Fine test material

Punctiform, fine registration of contacts.

HANEL Articulating Paper 200 µ

For the first stage of testing, to differentiate between areas of high and low masticatory pressure.
