MOiCO[®]

L'ODONTOIATRIA IN MOSTRA A VENEZIA

The Palazzo del Cinema at the Lido in Venice, Italy is the place where the International Film Festival is held.

The smile expressed through the art of cinema inspired Moico to create a surgical marathon where aesthetics cannot be reached only with science and conscience but also by art, to accomplish together the final goal: the smile and the well-being of the patient.

Moico is a surgical marathon with surgeons operating in glass "Cages".

For the first time in Europe surgeons will be in "Cages" that will faithfully reproduce a dental operating unit built with glass walls, making visible the surgical activity and projecting it "Live" on a big screen.
