

NEW

Moisture levels vary.
Our bond won't.

Prime&Bond universal™ Universal Adhesive

PART OF THE **CLASS II**  **SOLUTION™**

Variations in moisture level can be difficult to detect, especially in the depths of a class II proximal box. Thanks to the new, patented Active-Guard™ Technology, Prime&Bond universal™ adhesive provides reliable performance on over-wet and over-dried dentin, taking out some of the guess work and resulting in virtually no post-operative sensitivity.
