

ATRAUMATIC NEEDLE-SUTURE SETS AND STERILE SINGLE SUTURES

roeko **Sintraumal+Surgi-Fil**

Surgical sutures – gentle on the tissue
– save and easy to use

roeko

Sintraumal+Surgi-Fil

Surgi-Fil + Sintraumal are gentle on the tissue:

- The sutures have a hydrophobic coating and are non-capillary. As neither secretion nor water is absorbed by the suture, there is far less risk of infection.
- Sintraumal sutures do not cut into the tissue due to their special coating, thus reducing trauma.

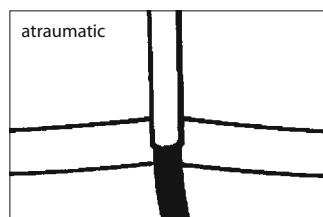

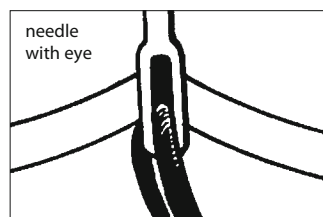

Surgi-Fil + Sintraumal are safe and easy to use:

- sterile in a double peel-pack
- easy and secure knotting
- the polyester suture is green and the silk black for easy identification in the tissue
- the tangle free suture can be quickly removed from the spool

Sintraumal

Atraumatic needle-suture sets

Sintraumal is a combination of precision ground, eyeless needles and non-resorbable silk or polyester sutures. The stainless steel needles are smoothly bound to the sutures, so pain and tissue damage often caused by needles with eyes, cannot occur.

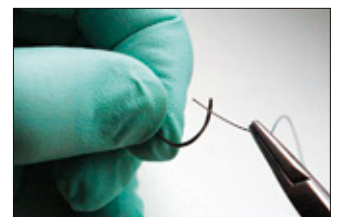

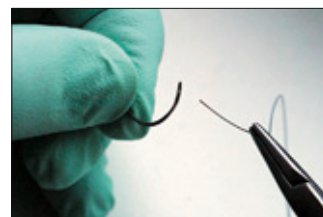

Surgi-Fil

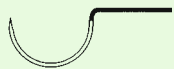

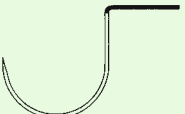

Surgical sutures without needles

Surgi-Fil silk sutures are made from specially braided silk, a natural fibre. The tissue compatible impregnation makes the suture non-capillary.

The specially braided thread is particularly suitable for sub-cutaneous stitches, ligatures and purse-string ligatures as well as for closing wounds. The thread is coloured black with haematein for improved visibility.

Surgi-Fil polyester sutures, Flexafil, are braided. Their hydrophobic coating makes them highly tissue compatible and prevents wicking. The excellent properties of Flexafil sutures make it suitable for ligatures, purse-string ligatures, vessel occlusion and for closing wounds. They are coloured green, to differentiate them from the silk sutures.

Indication	Needle 1:1 True sizes	Needle type	Gauge metric	USP	Suture 45 cm	REF
Operations in firm gum tissue		HS 20 ▼	1.5	4/0	Silk, black	490 301
Extractions		HS 25 ▼	2.0	3/0	Silk, black	490 302
Apical extractions and flap operations		DS 20 ▼	1.5	4/0	Silk, black	490 303
Extractions		HS 25 ▼	2.5	2/0	Silk, black	490 305
Extractions, e. g. Wisdom teeth, Serial extractions, Stiches in firm tissues		HRT 18 ◐	2.0	3/0	Flexafil, green	490 306
Flap operations, Periodontal surgery, Gingivectomy		GR 20 ●	1.5	4/0	Silk, black	490 307
Extractions, e. g. Wisdom teeth, Flap operations		AS 30 ▼	2.0	3/0	Silk, black	490 308

Contents: 12 pcs

Sintraumal is available in 7 combinations, the right combination for each case:

Available needles are round bodied needle, cutting needle, round bodied cutting needle (trocar finish). Available as half circle, 3/8 circle, straight and fish hook.

Symbols:

— round bodied needle

— cutting needle

— round bodied cutting needle
trocar finish

H — half circle

D — 3/8 circle

G — straight

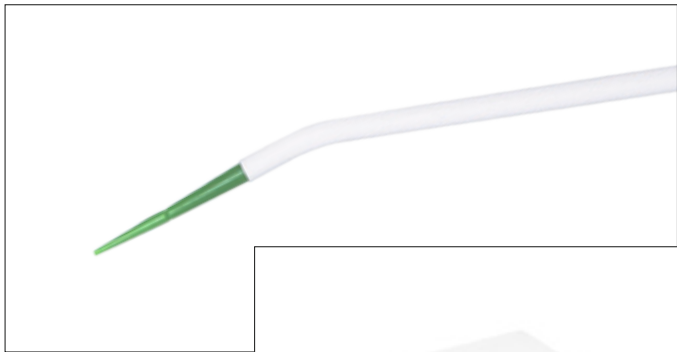

A — fish hook

R — round bodied needle

RT — round bodied, cutting,
trocar finish

S — cutting needle

roeko optimizing surgical procedures

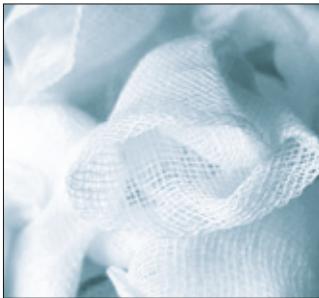

Surgitip-micro
sterile microsurgical
aspirator tip

Gelatang
resorbable gelatine sponge with colloidal silver

Steri-Quick
sterile cover

Roeko-Swab
sterile gauze swabs
